

inno FADER

Welcome to the next generation of fader technology. The **inno**FADER introduces an all new capacitance technology which means long life, ultra low maintenance and no bleeding - ever. And thanks to the non-contact technology, the **inno**FADER is also immune to even the most hostile of DJ environments.

The **inno**FADER comes with another first - full onboard cut-in and curve control, meaning you can add new adjustability to VCA mixers that may not already have it. The tension can also be adjusted to make the **inno**FADER suit your own style.

That's not all - because of the supplied adaptor boards, plates, screws and washers, the **inno**FADER is designed to plug and play with the widest range of VCA mixers around.

Comments from happy **inno**FADER users:

Sisyphus

"This groundbreaking device will help you get from where you're at to where you want to go better than anything I've ever seen. (Ten years in the game)."

Asan

"I welcome the Innofader, like a brand-new pair of Asics. Fresh last. Fresh insole. Dope, clean laces. Kicks light as shit, but every step feels fulfilling. Nice, smooth stride."

DJ Noname

*"The first thing that jumped out at us when working with this piece of kit is an overall sense of quality. From the packaging, to the **STOUT** stem on the fader, to the complete complement of tools and adapter boards that come with it, to the feel of the fader itself... first class all the way."*
